Dear Sir:

Submitted herewith is a (modified) citation Form PTO-1449, along with a copy of each of the documents listed therein.

U.S. Patents 4,922,141 and 4,253,147, listed on the Form PTO-1449, were cited in an Office Action dated June 6, 2002 pertaining to related U.S. Application Serial No. 10/102,237.

In addition, U.S. Patent 4,528,646 (hereinafter, "the '646 patent"), also listed on the Form PTO-1449, was cited in a brief dated August 30, 2002 submitted in an opposition proceeding filed against European patent 0 525 068 (hereinafter, "the EP '068") by Opposer OIII: Hynix Semiconductor (Deutschland) GmbH.

The EP '068 claims priority to the same parent application (Application Serial No. 07/510,898) as the instant application.

Attached hereto is a copy of this brief, along with a (non-certified) English translation thereof. Specific reference to the '646 patent may found starting on page 6 (in both the original and the translation).

It should be mentioned that the European Patent Office has issued, as an annex to a summons to attend oral proceedings in the above mentioned opposition proceeding, a preliminary non-binding opinion regarding, among other things, novelty, inventive step, and impermissible intermediate claim
